

DO NOT approve the "broadcast flag" for television signals!
This will do nothing to prevent copyright infringement
and will severely harm television viewers, technology companies,
and even entertainment companies (in the long term).
If recording a signal is contributory copyright infringement,
then car ownership is contributory reckless driving! Punish
the infringers, not the innocent users! Say NO to the
"broadcast flag"! No, no, no, no, no, NO, NO, NO!
